

UI / UX Brand Guidelines.

A WORKING HANDBOOK FOR PRODUCT DESIGNERS

01 — HOW TO USE

A book to design with, not a book to read.

01

Start with the principles.

Open §02 Foundation before you open Figma. The five principles unblock 80% of decisions before they hit a component.

02

Reach for tokens.

Colors, spacing, type, radii — every value in this book has a token name. Use the token, never the raw hex.

03

Compose, don't redraw.

The component library is the source of truth. If something is missing, propose a new component — don't fork an existing one.

FOR

Product designers

Build screens, flows, and prototypes from the system.

Brand & marketing

Adapt the kit for landing, ads, and campaign work.

Engineers & AI tools

Read tokens straight from §10 to wire components.

02 — BRAND FOUNDATION

What we believe, before what we build.

"Predictable leads, measurable growth — built from **clear, specific, accountable design.**"

MISSION	Build data-driven Google Ads systems that generate predictable, high-quality leads for service businesses — turning every rupee of ad spend into measurable growth.
VISION	The most trusted Google Ads growth partner for service businesses worldwide — known for consistent ROI and radical transparency.
VOICE	Bold & adaptable · Sleek & purposeful · Collaborative · Results-driven. Plain-spoken, never bro-ey for its own sake.

DESIGN PRINCIPLES

Five rules for the screen.

- P01 Clarity over cleverness.**
If a user has to think, the design is failing. State the action; show the result.
- P02 Receipts, not vibes.**
Every claim earns a number. Every state shows progress, status, or proof.
- P03 Density with rhythm.**
Use the 4 pt grid. Pack information; never crowd it.
- P04 Familiar before novel.**
Match platform conventions first. Innovate only where it moves the metric.
- P05 Accessible by default.**
WCAG AA contrast, 44 px hit targets, full keyboard reach — non-negotiable.

03 — LOGO SYSTEM

The mark, on every surface.

USE THE SUPPLIED MASTER FILE.
NEVER REDRAW, RECOLOR, OR SUBSTITUTE THE
WORDMARK.

3.1 · LOCKUP & CLEAR SPACE

CLEAR SPACE = X (HEIGHT OF DOT)

ON ROYAL BLUE

#3F5BD9

ON DARK

#0B0B10

MINIMUM SIZE

Digital · 32 px

Lockup height. Use icon-only below 24 px.

FILES

SVG · PNG · WebP

Source held by Brand Studio. Don't re-export.

HIT TARGET

Tap area · 44 × 44 px

Apply to the logo when used as a home link.

FAVICON

Mark only · 32 / 16 px

Yellow dot is preserved. No padding.

04 — COLOR SYSTEM

Four brand colors. Four states. One scale.

TOKEN NAMES ARE NORMATIVE. HEX VALUES ARE DERIVED FROM TOKENS, NEVER THE OTHER WAY.

Light Blue

#DCE3FF

color/surface/raised

R220 G227 B255

Royal Blue

#3F5BD9

color/brand/primary

R63 G91 B217

Deep Navy

#1E2A78

color/ink/default

R30 G42 B120

Signal Yellow

#EEC013

color/accent/highlight

R238 G192 B19

Success

#1B9D6B

Completed actions, positive deltas, success toasts.

Warning

#E2A21A

Soft cautions, low-budget alerts, pending review.

Error

#D6332B

Destructive actions, validation failures, downtime.

Info

#3F5BD9

Tips, neutral notices, in-product education.

Neutral scale

A horizontal bar showing a gradient of neutral colors from dark blue to light gray. Below the bar are numerical values: 900, 800, 700, 500, 300, 200, 100, 50.

900 800 700 500 300 200 100 50

05 — TYPOGRAPHY

Two families. One vertical rhythm.

OPEN SAUCE ONE FOR DISPLAY.
SPACE GROTESK FOR BODY. JETBRAINS MONO FOR CODE.

Aa

ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 0123456789 &! ? @ #

Open Sauce One

BODY · UI · LABELS

TYPE SCALE · 1.25 RATIO

type/h1	Build a measurable engine.	40 / 44
type/h2	Predictable leads.	28 / 32
type/h3	Section heading	20 / 26
type/h4	Card title	16 / 22
type/body	Body copy reads at 14 px with 1.5 line height. Use this for paragraphs, descriptions, and most product text.	14 / 21
type/small	Helper, caption, secondary metadata.	12 / 18
type/code	<code>const cpa = spend / leads</code>	13 / 20

A 4-point grid, top to bottom.

EVERY OFFSET IS A MULTIPLE OF 4.
LAYOUT FOLLOWS A 12-COLUMN GRID AT 1280 +.

Spacing scale

space/0		0 px
space/1	■	4 px
space/2	■	8 px
space/3	■	12 px
space/4	■	16 px
space/5	■	24 px
space/6	■	32 px
space/7	■	48 px
space/8	■	64 px
space/9	■	96 px

Layout grid · 12 columns

12 columns grid visualization

Max width

Gutter

Margin

Use 4 / 6 / 8 / 12 column splits for product views. Drop to a single column at sm; reduce gutter to 16 px at md and below.

BREAKPOINTS

xs

0 - 479

1 col · 16 px gutter

sm

480 - 767

4 col · 16 px gutter

md

768 - 1023

8 col · 24 px gutter

lg

1024 - 1279

12 col · 24 px gutter

xl

1280 +

12 col · 24 px gutter

07 — UI COMPONENTS

The atoms, in their resting state.

ALL RADII FROM RADIUS/MD = 8.
ALL PADDING FROM THE 4-PT SCALE.

BUTTONS · BTN/*

FORM FIELDS · INPUT/*

Email

Budget

Domain

Must include a TLD.

BADGES & STATUS

TABS & NAVIGATION

CARD · CARD/ELEVATED

DIALOG · MODAL/SM

08 — UX PATTERNS

Designed states, not just happy paths.

EVERY SCREEN SHIPS WITH 5 STATES.
IF ONE IS MISSING, THE DESIGN ISN'T DONE.

 Empty state A reason it's empty + the one next action. Never a blank screen. Create your first campaign	 Loading Skeletons for >500ms loads; spinners for <500ms actions. Never both. [Three horizontal skeleton bars]	 Error Name what failed in plain words, then offer the one fix. Never blame the user. Try again
PATTERN A ux/empty	PATTERN B ux/loading	PATTERN C ux/error

Onboarding · 4 steps to first lead

STEP 01

Connect Google Ads.

OAuth in a single click. We never write without confirmation.

STEP 02

Tell us the goal.

Pick a service vertical, target CPL, and weekly cap.

STEP 03

Review the plan.

Keywords, ad copy, landing — all editable before launch.

STEP 04

Launch & learn.

Live dashboard from minute one. Weekly review in plain English.

24-pixel grid. 1.5 stroke. Square caps.

ALL ICONS LIVE IN THE ICON LIBRARY.
DON'T IMPORT THIRD-PARTY PACKS AD-HOC.

Library

24 × 24 grid

2 px padding

- ✓ **24 × 24 frame, 20 × 20 keyline.**
Optical centering over geometric — favor balance, not pixel grid.
- ✓ **1.5 px stroke, round caps and joins.**
Outline style only. No filled icon variants.
- ✓ **currentColor.**
Inherit color from parent. Never hardcode hex.
- ✓ **Inline SVG.**
Ship icons in markup, not fonts. Bundle in /icons/*.svg.

One source. Many surfaces. Zero drift.

TOKENS LIVE IN TOKENS.JSON.
PIPE TO FIGMA, CODE, AND AI TOOLS ALIKE.

Core tokens

TOKEN	VALUE	USE
 color/brand/primary	#3F5BD9	Primary action, links, focus ring
 color/ink/default	#1E2A78	Body text, headings, icons
 color/surface/raised	#DCE3FF	Cards, chips, secondary buttons
 color/accent/highlight	#EEC013	Accent moments — ≤10% of a screen
 color/status/success	#1B9D6B	Confirmation, positive deltas
 color/status/error	#D6332B	Destructive, validation errors
space/4	16 px	Default component padding
radius/md	8 px	Buttons, inputs, badges
radius/lg	10 px	Cards, modals
type/body	14 / 21	Default body copy
shadow/raised	0 8 24 -16 rgba(20,30,80,.30)	Cards, modals, popovers

CSS VARIABLES

tokens.css

```
:root {  
  /* Brand */  
  --color-brand: #3F5BD9;  
  --color-ink: #1E2A78;  
  --color-surface: #DCE3FF;  
  --color-accent: #EEC013;  
  /* Scale */  
  --space-4: 16px;  
  --radius-md: 8px;  
  --type-body: 14px/1.5;  
}
```

AI HANDOFF PROMPT

prompt.md

```
# Build a Search Ads Bro screen  
Use tokens from tokens.json:  
- Primary action: color/brand/primary  
- Ink: color/ink/default  
- Cards: color/surface/raised, radius/lg  
- Padding: multiples of space/4  
Voice: bold, plain, results-driven.  
Components: pull from /components/.*
```

Now go build it.
